

CITY COUNCIL REPORT

DATE: September 17, 2015

TO: Mayor and Council Members

FROM: Mark Landsiedel, Community Development Director
Randy Whitaker, Project Manager

CC: Josh Copley, Barbara Goodrich, Jerene Watson & Leadership Team

SUBJECT: Fourth Street Pedestrian Crossings Update

This City Council Report is in response to a request for an update on the construction of permanent pedestrian crossings and other infrastructure features along Fourth Street.

DISCUSSION: Woodson Engineering has completed the construction plans for the project elements associated with the two permanent pedestrian crossings that can be constructed within existing right-of-way. The two permanent pedestrian crossings will be completed this construction season. The improvements will consist of installing the Pedestrian Actuated Signals and raised Pedestrian Refuge Median Islands associated with the signals.

Staff intends to commence discussions with a contractor on the Job-Order-Contract (JOC) list to procure the construction.

Property acquisition is required to install additional, future improvements of the pedestrian crossings, sidewalk/parkway, landscaping and bus pullouts.

A presentation is being scheduled for the September 29th Council Work Session.

RECOMMENDATION / CONCLUSION:

This report is for information only.
